

Keeping Aviation Safe

Aircraft Component MRO Services

Welcome to the SK AeroSafety Group

Knowledgeable, dependable, solutions driven

At SK AeroSafety Group, our commitment is clear: keeping aviation safe through proximity, turn around time & service. With facilities strategically located across Europe, North America, and Asia Pacific, we ensure industry-leading turnaround times that keep fleets flying and schedules on track.

Our purpose is simple—safety first. We achieve this through proactive maintenance, deep technical expertise, and a customer-first approach that puts your needs at the centre. Whether you're a global airline, regional carrier, or MRO partner, our proximity to major aviation hubs enables rapid response and seamless logistics support.

We take pride in delivering tailored solutions, backed by comprehensive certifications and OEM approvals. With an average group turnaround time of just 10 days and more than 80,000 jobs completed annually, our track record speaks for itself.

Through continuous investment in people, processes, and facilities, we maintain the highest standards of technical excellence. You can rely on us—around the clock—to deliver the dependable expertise that allows you to focus on your core business, knowing your operations are in safe hands.

Our Strength in Numbers

Global TAT 10 days

600 employees worldwide

€125m revenue in 2025

80,000 jobs completed annually

1 billion passengers kept safe

500,000+ spare parts in stock globally

Our People

Our Leadership Team

Tom McLaughlin
President / CEO Americas

Chris Wright
Chief Commercial Officer (CCO)

Ben te Beek
Group CEO

Matthijs Oehlen
Chief Financial Officer (CFO)

Dominik Wiener-Silva
President / CEO Europe

Tom has built a lifelong career in aviation, starting with major airlines before moving into MRO leadership. Since joining SK AeroSafety in 2024, he has been responsible for all business activities across the Americas, driving regional growth and strengthening customer partnerships through a commitment to operational excellence and service quality.

Chris joined SK AeroSafety in 2012 after serving in the Royal Air Force and establishing a successful career in commercial aerospace. With more than 34 years of industry experience, including founding and leading multiple aviation distribution and service companies, he now oversees the Group's global commercial strategy, sales, and customer partnerships, while fostering strong industry partnerships worldwide.

Ben joined SK AeroSafety in 2014 following eight years at Stork, where he held senior roles in both the Netherlands and the US. As Group CEO, he is responsible for leading the company's overall global strategy and performance, guiding the organisation through innovation, operational excellence, and customer-focused leadership to ensure sustainable growth worldwide.

Matthijs joined SK AeroSafety in 2025 as Group CFO, bringing extensive international expertise in finance, strategy, and operations. He is responsible for all financial management and global support functions, ensuring strong financial discipline and enabling the Group's long-term strategic growth and operational efficiency across all regions.

Dominik joined SK AeroSafety in 2025, bringing senior executive experience from leading airline groups including Lufthansa, Air France-KLM, and Singapore Airlines. With a proven global track record in strategy, operations, and MRO leadership, he is responsible for all business activities in Europe, ensuring results through operational excellence, customer focus, and a strong commitment to delivering value to aviation partners.

Our Purpose
Keeping aviation safe.

Our Vision
To be the best group of companies that specialise in the repair of safety and interior aircraft components for the global aviation market.

Our Mission
As One Team we deliver exceptional support to the aviation industry through a global network. Providing consistent quality, proximity, best-in-class turn around times and excellent service. Helping customers worldwide maintain safety and reliability at all times.

Our Products

The SK AeroSafety group provide maintenance, repair and overhaul services across the full spectrum of aircraft safety and interior equipment. Our safety capabilities include Oxygen cylinder, Oxygen Masks and stowage boxes, Fire extinguishers, Slides and Rafts as well as other safety components (i.e. life jackets, smoke hoods, emergency locator beacons, etc.). Our interior capabilities include Galley inserts, Cockpit security, (Crew) Seats & Restraints and Water & waste components. We have a number of OEM approvals with leading OEMs including Safran, BE Aerospace, Kidde/Hotelier, Eastern Aero Marine, Adams right, IPECO, ADOS and Liebherr. Select facilities also offer specialised capabilities in heat exchangers, electrical systems, starter generators and fuel and hydraulic components.

Our Services

To support our customers across the globe, we provide additional services that enhance and complete our offering:

Pick-up & Delivery – Free Efficient logistics to reduce downtime and cost.

Exchange & Rental Units – Immediate availability of safety-critical components.

MBM (Maintenance-by-Month) – transforms traditional repair models into a fixed monthly fee program

Inventory Management – Over 500,000 spare parts strategically stocked worldwide.

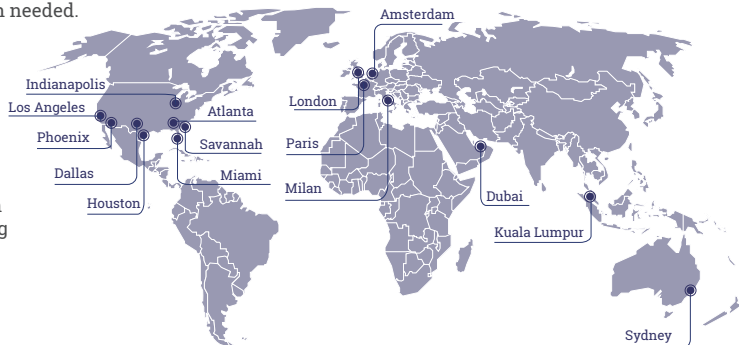

Digital Customer Access – Real-time job tracking, certification retrieval, and performance dashboards.

Specialised Sourcing – Strategic halon availability and OEM-backed support.

Our Global Locations

With 19 service centres across North America, Europe and APAC, SK AeroSafety Group provides truly global support. Strategically located near major aviation hubs, our facilities deliver fast, dependable turnaround times and seamless logistics, ensuring critical safety equipment is maintained and ready when needed.

Our global reach is strengthened by OEM approvals, international certifications, and a commitment to consistent service excellence. Wherever you operate, our network combines local expertise with worldwide standards—keeping aviation safe, reliable, and ready to fly.
